DATA CENTRES

ST Telemedia Global Data Centres | www.sttelemediagdc.com

ST Telemedia Global Data Centres (STT GDC) is a fast-growing data centre provider headquartered in Singapore. With a growing global platform of over 50 high quality, carrier-neutral data centres in the world's major economies including Singapore, China, India and the United Kingdom, STT GDC offers a full suite of best-in-class, scalable and mission-critical network connectivity and infrastructure management solutions to meet customers' current and future colocation needs. STT GDC's group of companies include, VIRTUS Data Centres – the fastest growing data centre provider in the UK, and GDS Holdings – a leading developer and operator of high performance data centres in China. In Singapore and India, the data centres operate under the 'ST Telemedia Global Data Centres' brand.

COMPANY PROFILE

GDS | www.gds-services.com

NASDAQ-listed GDS is a leading provider of high performance data centre infrastructure and services in key markets across China. It provides managed IT services, hosting services, and cloud computing infrastructure to customers with business-critical IT operations. GDS serves major national and international financial institutions, large enterprises, government agencies, and top-tier internet companies. GDS is part of the ST Telemedia Global Data Centres platform.

VIRTUS Data Centres | www.virtusdatacentres.com

VIRTUS Data Centres, the UK's fastest growing data centre provider, owns, designs, builds and operates the country's most efficient and flexible data centres. VIRTUS leads the industry with award winning innovation in hyper efficient, ultra-high density and highly interconnected facilities. The data centres are located in and around London's metro - offering the best of traditional retail and wholesale colocation with low latency and high connectivity to the world's leading networks. VIRTUS is part of the ST Telemedia Global Data Centres platform.

STT Connect | www.sttconnect.com

ST Telemedia Connect (STT Connect) provides a secure, enterprise-grade private cloud infrastructure, backed by industry-leading service level agreements and expert support. The company integrates industry-leading technologies to deliver high performance compute, storage and network through our core solutions - virtual private cloud, dedicated private cloud, and hybrid cloud - endorsed by top industry certifications including ISO27001 and Singapore's highest standard for multi-tier cloud security - MTCS SS 584 Level 3. Centred on businesses needs for agility without vendor lock-in or compromising on security, STT Connect's offers cloud based solutions empowering organisations with more flexibility and control over their IT resources.

EMERGING TECHNOLOGIES

Armor | www.armor.com

Armor is The First Totally Secure Cloud Company™ that protects customers' vital assets and helps prevent data breaches through managed multi-layer security for public and private clouds. The Armor team also applies extensive military cyber security experience for proactive threat detection, response and remediation.

COMPANY PROFILE

Datameer | www.datameer.com

Datameer is a big data analytics company based in San Francisco, California that leverages the power of Hadoop with a spreadsheet interface, enabling business users to easily run analytics against very large data sets with no programming required. Founded since 2009, the company has demonstrated strong customer traction with some of the world's leading financial institutions, telecommunications carriers and global companies.

Greenwave Systems | www.greenwavesystems.com

Greenwave Systems (Greenwave) is an IoT and M2M enabler that works with telecommunication providers, utilities and other companies to develop solutions for managed services, including home automation, connected lighting, energy management and other M2M services. Its award-winning proprietary AXON platform® allows users to manage new devices and applications on an operator network. Greenwave is headquartered in Irvine, California with offices in Denmark, South Korea, and a research & development centre in Singapore.

Moogsoft | www.moogsoft.com

Moogsoft is a leading provider of IT Operations Analytics (ITOA) for modern private, public cloud and hybrid IT environments. Headquartered in San Francisco, California, the company employs innovative technology and approaches to help large enterprises better manage their hyper-converged IT infrastructure and enhance service quality through Big Data analytics. Moogsoft's client base include blue chip enterprises and major service providers with massive, web-scale, complex IT architecture.

Instart Logic | www.instartlogic.com/

Instart Logic is an award-winning company which developed the cloud-based, artificial intelligence-driven digital experience platform that enables brands to increase their online performance. By connecting brands' cloud, web and mobile applications with customers' devices via the platform, Instart Logic is able to help brands automatically improve performance, consumer experience and security. The end result for brands is an ultra-fast, visually immersive and secure experience on any device to maximise revenue, deliver superior customer experiences and gain competitive advantage.

Bespin Global | en.bespinglobal.com/

Bespin Global is a leading cloud management company based in Seoul and Beijing. It helps enterprise customers move their legacy IT operations to the cloud and use cloud effectively to power their digital transformation. Bespin Global serves over 190 including some of the world's largest companies. It is the only company in East Asia to be recognised in Gartner's 2017 Magic Quadrant for Public Cloud Managed Services Provider (MSP).

COMMUNICATIONS & MEDIA

StarHub | www.starhub.com

Listed on the Singapore Exchange, StarHub is Singapore's fully-integrated info-communications company, offering a full range of information, communications and entertainment services for both consumer and corporate markets.
